

Heritage River Birch

Betula nigra 'Heritage'

TREE DETAILS

Growth Speed

Fast

Mature Height

40' - 50'

Mature Spread/Width

25' - 35'

Shape

Oval, Pyramidal

Sun Preference

Full Sun, Partial Sun/Shade

Soil Preference

Acidic, Clay, Drought, Moist, Sandy, Well-Drained

Highlights

The Heritage River Birch offers the most colorful bark, displaying curls of light brown, orange, and purple all year long. It's also fast-growing, disease resistant, drought and flood tolerant, and great at withstanding severe weather. The tree features spreading limbs, and colorful, peeling bark and provides beautiful yellow fall foliage. It does well in both dry and wet conditions and can withstand strong wind and ice. It will grow two to three feet each year.
